REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 21 | THE REDCLIFF REVIEW | THURSDAY, SEPT. 29th, 1932 | Sumber 49

Town Council Calls Ratepayers' Meeting

Will be Held in Cliff Hall On October 5th.

The regular meeting of the town council was held last Monday evening with Mayor Worts in the chair and councillors Smith, Shaw, Hargrave, Sangster and Lavelle present.

The Board of Public Utilities Commission wrote stating that on no condition could the town enter into any agreement for the purpose of placing unemployed on the land.

Aletter was read from the School Board asking for the usual monthly cash for general expences. The request was complied with on motion of councillors Hargrave and Sangster.

A. R. Ballantyne C. P. R. agent wrote drawing attention of council to conditions of approaches to the station. Mr. Kitchen reported that the matter had been attended o.

A letter signed by thirty-ratepayers' was presented to council asking that the Mayor and c un cil call a ratepayers meeting for the purpose of discussing the financial conditions of the town.

On motion of councillors Lavelle and Hargrave it was decided to call the meeting as requested and that same be held in Cliff Hall Wednesday evening Oct. 5th at 8 o'clock.

Some local accounts were approved for payment.

Mis Rose Mignault, of Tompkins, is spending this week in town visiting her brother Tom.

* * *

Workmn have compleed putting a new roof covening on the Redcliff hotel.

* * *

The Ladies' Auxiliary to the Legion will meet in the I. O. O. F. Hall on Wednesday next at 2:30 n the afternoon.

* * *

Miss McDoald, of the public school staff, is still on the sick lish. She has been unable to attend to her duties for the past two weeks.

* * *

Just as we go to press we learn that the Diamond D football dance, billed for tomorrow night, has been vostponed till next Friday.

* * *

The Arena rink committee of Mdicine Hat has decided to commence the reconstruction of the building at once nd have it in shape fr hockey this winter.

* * *

Several arrests have been made in westrn cities for men who hae taken relief when they were not entitled to it.

* * *

Dr. T. Albert Moore, Toronto, secretary to the general council of the United Church of Canada, was elected sixth moderator of the church by the geeral council in session at Hamilton.

* * *

To celebrate the silver wedding of Mr. and Mrs. A. Anderson, Mr. and Mrs. R Pedersen entertained about forty guests to dinner last Sunday. Mr. and Mrs. Anderson have resided in Redcliff for the past five years and have made many friends all of whom wish them many more wedding anniversaries.

Harvest Festival At St. Ambrose Church

Special Srevices, Also Social on Monday Evening

The annual Harvest Festival will be observed in St. Ambrose Church on Sunday next, the services being as follows:

9 a. m.—Holy Communion.
11 a. m.—Choral Eucharist.
7:30 p. m.—Evensong and sermon

There will be special music and addresses at all servics.

On Monday evening next the annual whist drive and sale of vegetables will be held in the parish hall. This will be an excellent opportunity for everyone to stock up with winter vegetables.

Everyone cordially welcome to the Sunday service and to the whist drive on Monday evening

A new telephone booth has been installed in the poast office for the convenience of the public.

* * *

Mr. and Mrs. J. Moran, of Lethbridge, spent last week-end in town visiting the latter's parents Mr. and Mrs. P. Lavelle.

* * *

At a country church recently the preacher took as his subject "Is Liquor Desirably?" The choir then sang: "O Taste and See."

* * *

Mrs. Trembath, who is on her way from Michigan to Kamloop, B. C., is stopping over here this week to visit her son and Mrs. Tremath.

* * *

Miss Phyllis Sanderson has been accepted into the Medicine Hat hospital as a student nurse. She will commence her duties there some time in March.

* * *

Vega Lodge are arranging for a hard time dance to be held in their lodge rooms on Friday, Oct. 29th. Fuller particulars will be given later. In the mean time keep the date open.

* * *

Churches

ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a. m.

* * *

ST. AMBROSE CHURCH

Rev. Malcolm Stewart, Vicar
9 a. m. Sunday School.
1st and 3rd Sundays
11 a. m. Choral Eucharist.
2nd, 4th and 5th Sundays
11 a. m. Matins and Sermon.
7:30 p. m., Evensong and sermon.

GORDON MEMORIAL UNITED CHURCH

Pastor: Rev. R. Erskine Pow
Sunday, October 2nd.
10 a. m. Church School.
11:15 a. m. Morning Worship
Subject: "Prayer for Light."
3 p. m. Bowell.
7:30 p. m. Evening Worship.
Subject: "Christianity and Wealh."

"Thou Crowneth the year with Thy goodness."

Two Car Accidents On East Highway

One Car Goes Over Culvert, Other Strikes Truck

Last Saturday evening there were two car accidents between here and Medicine Hat. James Sprat of Buffalo was going home from the Hat and in turning onto the Empriss trail he missed the trail and ran over a culvert. Sprat was only slighly hurt but the car was bad ly damaged.

After the accident a driver of Kinnaird's truck stopped on the highway to see what had happened and another car ran into his truck. The second car was driven by Annon of Winnifred and with him were Tony Menini Wm. Annon and Jules Levine. all were badly shaken up and the driver and Menini were taken to the hospital. The Annon car was also badly damaged.

Free Traders Resign From British Cabinet

Zlb&Three Were Cabinet Ministers and Eight Junior

Three cabinet ministers and eight junior ministers on Wednesday tesigned from the National government, their free trade views compelling them to leave a ministry whose majority is pledged to implement the trade agreements signed at the Ottawa Imperial Conference.

Two Conservatives and a Liberal were appointed by Prime Minister Ramsy McDonald late Wednesday to fill the three cabinet vacancies created by the resignation of Viscount Snowden, Ser Herbert Samuel and Sir Archibald Sinclair.

Sir John Gilmour, Concervative, succeeds Sir Herbert as home secretary. Sir Godfrey Collins, Liberal, is the new secretary foir Scotland, succeeding Sir Archibald. Major Walter Elliott, Coservative, was appointed minister of agriculture, the post vacated by Sir John Gilmour.

BIG SAVING FORCAST ON CAN. NAT. SYSTEM

When the public accounts are tabled at the approaching session of Parliament the economies which have been effected in the opporation of the Canadan National Railways are likely to make a profound impression.

Figures ranging from $20,000 000 to $28,000,000 have been publised recently as representing the economies which have been effected in the operation of the road. These figures apply only to the running expenses, however and do not take into account the drastic pruning which has been done upon capital expenditures. Taking this latter saving into account, it is authoritatively stated that the government-owned road will report expenditures approximately $47,000,000 bel w last years total.

Thanksgiving Day will be observed this year on Monday, October 10th.

How is Your Subscription?

Notes From The Wheat Pool Bulletin

Issued by he Publicity Department of the Pool

Alberta Wheat Pool sold two cargoes of wheat to China on September 19th.

Alberta wheat growers desiring to place their wheat in the 1932-33 pool must designate their intentions upon delivery of the wheat.

Stocks of wheat at Liverpool amount to only 1,264,000 bushels compared with 5,166,000 bushels at this time a year ago.

The Alberta Pool elevator at East Coulee has been moved to Tilley and is now open for business. This is a 40,000 bushel house.

Russian sowings of winter wheat were 16,390,000 acres on September the first as compared with 24,908,000 acres on the same date the previous year.

Alberta Wheat Pool reports a larger volume of wheat being delivered on Pool basis this season and date than compared with volume Pooled same date a year ago.

Here and There

Honey produced in Canada in 1931 totalled 27,367,397 pounds valued at $2,058,664. Honey is produced commercially in all the provinces of Canada.

Registering an impressive advance in prices over recent years the first batch of Nova Scotia apples in the Liverpool market brought 22s to 25s per barrel as compared with 8s to 10s in 1931.

Great improvement and development over a period of 30 years has been noted in the Canadian seed industry. Last year 3210 seed farms with 12,000 persons occupied in the production and marketing of improved seed were estimated engaged in the industry.

Preliminary returns of maple sugar production in Canada just completed for 1932 show a total yield of 1,744,479 gallons of maple syrup valued at $2,054,277 and 7,217,500 pounds of sugar valued at $892,480. This production compares favorably with that of former years.

Cutting of wheat is nearing completion and threshing is well advanced in all the Prairie Provinces, with Manitoba leading, according to a report from the agricultural department of the Canadian Pacific Railway, western lines, dated September 10. Oats and barley at that date were 76 per cent. cut.

Lisa Commanda, Chippewa Indian girl golf caddy at the Canadian Pacific French River Bungalow, who came eighth in the women's marathon swim at Toronto, recently, has been presented with a purse of $150. J. G. Strathdee, manager of the Camp, stated that she would be thoroughly trained and would enter the contest annually until she won.

Wheeling airplanes added a roaring farewell to the cheers with which passengers and well-wishers speeded Captain J. A. Mollison on his return to England aboard the Empress of Britain as she sailed on her seventh departure of the 1932 season from Wolfe's Cove, Quebec. The intrepid solo trans-Atlantic flyer was promised a quiet time on his trip by Captain Latta, commander of the Empress.

"I am not running away from the election. I am out of politics and have no vote in the district of Columbia," said Mrs. Woodrow Wilson, widow of the famous United States war-time President, interviewed at the Banff Springs Hotel recently, where she stopped en route to Tokio where she is attending the marriage of a family connection. Mrs. Wilson motored on to Chateau Lake Louise as part of her tour of the Canadian Rockies.

"I have never seen a more beautiful country or enjoyed a visit more," said Sir Philip Cunliffe-Lister, British Secretary-of-State for the Colonies, as he said farewell to British Columbia when boarding the Canadian Pacific Imperial Limited on his way to Calgary. He enjoyed his favorite sport, fishing, in that province, where he and his party took four fine fish, including a 17-pound salmon. (869)

Everything Ready For Drumheller Trip

Team Will Leave Armory At Ten Saturday a.m.

Drumheller is evidently looking forward with interest to the football game to be played there next Saturday with the Redcliff All Stars. The Drumheller Mail says: "The Redcliff agriga tion proved to be one of the toughest in Western Canada for the Miners while on their tour. Reference is also made to the fact that three old players of the Drumheller distict, in the persons of George and Tom Davies and Jack Hope will be on the Redcliff line up.

The team wil l leave here as soon after ten o'clock on Saturday morning as posalble. All players are requested to be at the armory at 10 o'clock.

Any one who cannot be on time should leave his name with Bill Evans at the hotel as soon as possible so that arrangements may be made to pick him up.

We understeand several private parties will join the procession and that one of the jitneys is arranging or a load at a reasonable rate.

The players who are asked to be at th Armory on time are: I. Hope, G. Davies, T. Davies, J. Davies, Houston, Kelner, Foy, Lawson, Turner, Patterson, Podesta and Thomson.

Since the above was put in type a meeting of the players and committee was held and it was decided to leave Redcliff promptly at 1:30 on Saturday afternoon and that all would assemble at the armory. Arrngements are completed for the transportation of the players and for their accommodation at Drumheller.

NEW YORK YANKEES WIN FIRST TWO GAMES

The New Cork Yankies won the first game in the world's basebell series yesterday by 10 runs to 6. The Chicago Cubs got 2 runs in the first innings and 2 in each of the seventh and eighth. The Yankees scored 3 in the fourth, 5 in the sixth, 2 in the seventh and 1 in the 8h.

The Yankies won out again today by 5 runs to 2. The next game will be played in Chicago on Saturday.

* * *

As a result of the heavy rans of the past two weeks, much of the wheat which was cut with headers and stacked has been considerably damaged and is not turning out as well as it otherwise would have. Sprouting and dampness will reduce the grades several points.

* * *

Gandhi who was on a hunger strike for six days because he couldn't get what he wanted from the British government has compromised enough to warrent Gandhi in breaking his "death fast" and taking a little nourishment. In future if the British Dominions do not get all they want from the Imperial government at the Imperial conferences. Their premiers will know what to do. A little fasting might go a long way toward helping our Dominion premiers to get back their boyish figures and complections.

Gordon Memorial Holds Anniversary

Church Nicely Decorated For The Occasion

Gordon Memorial held its anniversary last Sunday and Monday.

On Sunday there were special services both morning and evening.

Dr. Thomas Powell was the special speaker for the occasion. He gave two very impressive adresses to the congregations which assembled for the occasion. In the morning he took for his text: "Behold My Hands The speaker then applied his text to the hands of Jesus, the the hads of the individual and the hands of the congregation and referred to them as meaning service, couage and toil. In the evening his text was: "Jesus, the poneer of Life," in which he showed how much we owe to pioneers in all phases of life who were always, ahead of the times and many of whom were persecuted, criticized and sometimes condemned.

Dr. Powell also gave an interesting talk to the Sunday School before the morning service.

The church was beautifully decorated with flowers for the occasion and both choirs rendered appropriate music in a very credible manner.

On Monday the Ladies' Aid held their annual supper and concert. The supper, which was in keeping with the reputation these ladies have for such vnts, was, dspit present conditions, well patronized and thoroughly enjoyed. After the supper a good musical program was put on by local talent assisted by Medicine Hat artists. Most of the entertainers have appeared before a Redcliff audience before and the program was of the usual well rendered and entertaining style.

On the whole the anniversary occasion was most successfully observed.

Business places in town which hae radios installed are being well patronized these days, by baseball fans who are anxious to hear the result of the world's series.

* * *

The Altar Society of the St. Mary's Church will hold their annual supper in the I. O. O. F. Hall on Monday, October 10th. (Thanksgiving Day.) Supper will be seved form 5 to 7 p. m. After the supper there will be a whist drive and dance in the same hall. All are invited to attend both these events.

* * *

The change in the train service has made it a bit awkward for business places here both regarding mail and daily papers. However it will be only a matter of a few days until we get accustomed to it. As the mail from the east does not arrive now till six o'clock only firts class mail will be distributed in the evening and only those having boxes will be able to secure that mail. As the morning mail from the west does not arrive now till 8:42 the morning paper for breakfast and the mail on the way to work will be out of the question.

Initiative Wins.

When Marshal Foch was given command of the French army during the World War, one of the first things he is reported to have said was: "To h—l with history and principles! What is the problem?" Though Foch was perhaps the world's greatest student of military strategy, he was no slave to it. He tackled each problem with initiative and vim. This method won for Foch.

The Review of Reviews magazine declares that a study of recent reports will show that those industrial organizations that exerted wise and sustained vim and initiative profited more than those which stood pat watchfully waiting, or those which imitated others. It points out that the larger the business, the more it tends to become standardized. Systems and routine often kill initiative and stifle progress. This explains in part why a small organization will so often place a new, out-of-the-ordinary product upon the market, something for which a real need has long existed but which no one previously appeared to have recognized.

Safety glass, now used so widely for windshields and bank cages, is the result of alertness and initiative. Non-shattering glass was discovered accidentally by a French chemist who knocked over a test-tube that had been used for months. Stooping to pick up the pieces, he discovered that the paste substance in the tube held the broken glass intact. Mentally alert, the chemist remembered that the tube contained a mixture of trinitro-cellulose, ether and acetone. Experiments followed and safety glass was the result.

Rear Admiral David Watson Taylor is credited for having been able to reduce the coal bill of the United States Navy by one-half, utilizing the bow wave for ship propulsion. A biscuit company making money only erratically saw its sales rise enormously by fashioning cookies in the shape of dogs, animals, and similar enticing forms. A manufacturer of towels was able to build up sales enormously by introducing towels in colors to harmonize with the bathroom tiles. Children's towels were created. Complete ensembles were worked out—towels, washcloths, bathmats. That plant is reported to have maintained full capacity throughout the depression.

Foods have undergone marked development because of research followed by initiative. It was discovered that tomato juice is rich in vitamines A, B, and C, and in three years, tomato juice has caught the public's fancy. Progressive manufacturers of canning machinery were alert to their opportunity. In two years the sales of canned tomato juice have a gain of 629 per cent., and bottled 177 per cent.

Today there is no paucity of opportunities. But there is paucity of vision, initiative, and courage to capitalize them. As Charles Kettering, vice-president in charge of research, General Motors Corporation, says, "Business will come back when we get products that people want to buy. If one-tenth of the energy was spent in getting such products instead of stirring up the mud, we would get along better."

The task of leaders is to lead. There is not an industry or a line of manufacture but affords unappreciated opportunity for initiative. Today, as during the days of the World War, executives might think to advantage as Marshal Foch was thinking when he said, "To hell with history and principles! What is the problem?"

Britain Is Providing Underground Airports

'Planes Will Use Inclines To Come To Surface

Underground airports are to be provided for the British Air forces. This decision was made after it was found that no camouflage could hide the hangars from the powerful lenses now being used in military cameras. The new airdromes will be at a minimum depth of thirty feet. There will be inclines for 'planes to come to the surface and take off.

It is good to have money and the things money can buy; but it is good, too, to check up once in o while, and make sure you haven't lost the things money can't buy.

Try Lydia E. Pinkham's Vegetable Compound

Felt Terribly Nervous

Fagged out . . . always melancholy and blue. She should take Lydia E. Pinkham's Vegetable Compound. Its tonic action builds up the system. Try it.

Grow Seedless Grapefruit

Secret Was Originally Discovered By South African Plowman

South African planters have mastered the secret of growing seedless grapefruit, and bulk supplies are now beginning to be exported. A careless plowman discovered the secret originally. His blade came in contact with a grapefruit root and a small tree, growing from the incision, produced sterile (seedless) grapefruit. South African growers experimented and found that similar fruit could be produced only under special conditions.

Persian Balm preserves and enhances women's natural heritage of beauty. For sheer feminine loveliness it is unrivalled. Tones and rejuvenates the skin, and makes it exquisite in texture. Delightful to use. Smooth and velvety, it imparts a youthful charm to every complexion. Indispensable to all dainty women. Especially recommended to make hands soft and white. Delicately fragrant. Preserves and enhances the loveliest complexions.

A new camphor factory in Japan is to make intensive studies of the economic and scientific side of the camphor industry.

Muskrats, introduced into Great Britain in recent years for fur breeding, are now pronounced a menace, due to their burrowing habits.

Men's Greatest Invention

Hammer Is More Necessary Than Any Tool Made

If you ask half a dozen people what they consider to be the greatest invention ever made, the majority will suggest such things as the steam engine, the dynamo, or the electric telegraph. But these are only the results of a much earlier and far more important discovery. The earliest and greatest invention ever made by man was the hammer.

You cannot undertake any piece of constructional work without a hammer. Though you may not actually use it, it must have been employed in making the tools with which you do the work. The hammer was the first tool which enabled man to multiply his strength; to do something which was impossible with his bare hands.

It was probably invented by a remote ancestor who had the inspiration to use a stone for cracking the shell of an oyster or whelk. The earliest hammers had no handle. They were merely conveniently shaped stones held in the palm of the hand.

Fasten such a stone to a handle and you have a much more effective tool. Sharpen its business end to an edge by chipping off flakes, and it becomes a stone axe. The formation of an edge on the earliest flint tools could be done only by means of a hammer. The hammer thus gave birth to both the axe and the adze, the earliest of cutting tools.

From the adze and the chisel to the saw is but a step. The drill is simply a small chisel. It was first fixed to a round shaft and rotated by the palms of the hands; later, primitive man invented the bow and string method of turning it. The bow and string drill is still in use in certain trades.

Medical Science Finds Chinese Doctors Right

Experiments Prove "Pin-Prick" Cure Has Its Merits

The Chinese doctors have one method of curing their patients which has always bewildered and amused the western world. If a man is ill, they stick a pin into him. If not a pin, at any rate, a needle or a copper wire filed to a point. They do just that, and nothing more. No drugs are used.

In a good many ailments this cure has nearly always been successful, and westerners put it down to faith curing—the powers of suggestion. Now, after many centuries, medical science has decided there is something in it, and the Chinese experts are asked to demonstrate their methods.

Pricking a patient with a needle in the right spot has a certain effect on nerve centres. Experiments have shown that it causes a cessation of violent neuralgia, or sciatica; it has given temporary relief from asthma and has proved helpful in various forms of stomach or internal disorders, giving instant relief.

Research into acupuncture—"pin-prick cure"—has only just started, but it is quite likely that in a few years it will be largely used instead of pain-soothing drugs.

Stock Exchange Seats Up

Estimated Value Shows Big Increase In Short Time

With the recent sale of a seat on the New York Stock Exchange for $120,000 the value of the 1,375 seats went up by 33 per cent. The estimated worth of the seats is now placed at $165,000,000, an increase of $41,250,000 over the total of a week before.

The traders in Wall Street are preparing to pick up what they left on a few years ago. It is getting on for three years since the crash on October 29, 1929, when 16,400,000 shares changed hands.

People have been hoarding their money for a long time. They are beginning to feel the itch to spend. The stock exchange is one of the barometers, even if it is a place where many lose their savings. And the exchange is girding itself for a pick up in its business.—Border Cities Star.

Higher Education Popular

There were 57,394 students in the twenty-three universities in Canada during 1931, and 25,137 attended the 101 colleges in the Dominion. Of the net total of individual students at both universities and colleges there were 46,354 males and 25,798 females who followed the higher education. The ladies secured 35.7 per cent. of the diplomas, licenses and degrees granted.

Visitor says American schoolgirls are too fond of gum. Part of their chewition, no doubt.

Keep that drain *clear*. . . .
this easy way

Gillett's Lye dissolves clogging grease and never harms enamel

DON'T run up a plumber's bill every time your drain pipes clog. Fix them yourself . . . this easy, workless way.

Just sprinkle Gillett's Pure Flake Lye down your drains and toilet bowls each week. Use it full strength, for Gillett's Pure Flake Lye will not in any way harm the finish of enamelled sinks or bathtubs.

Grease and dirt dissolve like magic. Germs are killed. Odors banished. Your drains run free and clear. And . . . there's no plumber's bill afterwards!

Tell your grocer it's Gillett's Pure Flake Lye you want. This powerful cleanser and disinfectant saves hours of scrubbing. Try a tin.

FREE BOOKLET. The Gillett's Lye Booklet tells many ways to make all your cleaning easier. Gives complete instructions for soap making, for free warping, disinfecting, and other uses on the farm. Write to Standard Brands Limited, Fraser Ave. & Liberty Street, Toronto, Ontario.

GILLETT'S LYE

Never dissolve lye in hot water. The action of the lye itself heats the water.

EATS DIRT

Motion Without Motive

Chinese Description Of Western Civilization Fits Speed Maniac

Judging by the number of convictions in recent weeks, the Ontario authorities are in earnest in their determination to make the highways of that Province safe for the average motorist.

There is rarely any intelligent reason for driving a car beyond a reasonable speed. Occasionally, in an emergency, fast driving may be justified. For the most part it is merely craziness.

One of the most frequent causes of fast driving is the desire merely to pass some one on the way to nowhere in particular. Which gives point to the Chinese observer's description of Western civilization as "motion without motive." The speed maniac might just as well be driving around an enclosed motor speedway as on the public highways. Perhaps something of the kind may eventually be provided for those infected with the speed virus.—Winnipeg Tribune.

Buys His Home Village

After an absence of more than 40 years, William McGregor, who left his home in Lathenonwhed, Caithness, Scotland, to seek his fortune in Australia, has returned to become the owner of his native village. As a boy he was employed in herding cows. Director of several Australian companies, he came back to visit his sister, Miss Jessie McGregor, who still lives in the cottage where they were born. He bought the village when it was placed on the market recently. It has about 120 inhabitants.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is this succor it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

His Voice

Newedd was showing an office friend over the young couple's new house.

"All this luxurious furniture is my wife's idea, you know," he explained.

The friend nodded approvingly.

"Very nice, I'm sure," he replied; "but surely you had a voice in the matter."

"Yes, the invoice," said the young husband.

Erosion taken 21 times as much plant food from the field and pastures of America as is removed by harvested crops.

Bad Constipation And Sick Headaches Ended By Vegetable Pills

Formerly a wreck from Constipation, Sick Headaches and Indigestion, Mr. V. H. writes: "It was a red-letter day for me when a friend recommended Carter's Little Liver Pills. Results have been marvellous.

Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Acidity, Biliousness, Poor Complexion and Indigestion. 25c. & 75c. red pkgs. Ask for Carter's by NAME.

Mine Taken Over By Workers

Interesting Experiment Is Under Way In Nova Scotia

For a quarter of a century the people of Inverness, N.S., have been working for somebody else. Now they will be in business for themselves, directing and operating the coal mine that is the only industry in the town, and marketing its products.

Their co-operative plan, approved recently by the government of Nova Scotia, is expected to banish the threat, long dreaded by the town's 3,000 inhabitants, that the mine would be closed.

Under the agreement with the government, operation and control of the mine has been transferred to a new company, the Inverness Coal Co-Operative Company, Limited, members of which are to be miners employed in that mine and taxpayers of Inverness.

Canadian Radio Programme Broadcast From 'Plane

Contact Made With Station From Height Of 3,000 Feet

An advertising stunt that proved of some scientific importance was accomplished here recently when Arthur Dupont, local radio announcer, and Sydney M. Nesbitt, aeroplane club official, successfully established contact with a Montreal radio station while flying 3,000 feet over the city. Both men gave short addresses which were clearly received by many wireless fans. It was believed to be the first Canadian radio program broadcast from an aeroplane, though short addresses were broadcast from the airship R-100 over Ottawa in 1930.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

New Paint Seems Uncanny

How hot a kettle is at any moment can be told by the color of a paint which has just been invented. A kettle painted with the new material, which is a mixture of salts of mercury and copper, looks bright red when cold, but as it warms up above 140 degrees it becomes maroon colored. At 20 degrees higher it takes on a dull chocolate hue, and at boiling point it is quite black. Cooling brings its color back.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective is mild.

"Too bad about Tom and the girl he's engaged too. Neither one of them is good enough for the other."

"Where did you get that idea?"

"I've been talking the matter over with both families."

About one-half the world's lepers are in China.

Rice accounts for about 80 per cent. of Siam's exports.

Feeder Purchase Policy

Designed To Encourage Winter Feeding Of Cattle and Lambs

Renewal of the Feeder Purchase Policy designed to encourage the winter feeding of cattle and lambs of suitable type and quality is announced by the Hon. Robert Weir, Federal Minister of Agriculture. Under the terms of this policy, broadly put, the Federal Department will pay the reasonable travelling expenses of a farmer or his agent to the stockyard point of purchase, the feeder sales, or nearest station to range point at which feeder stock is purchased. To secure the benefits of the policy at least one car of stock (20 head of cattle or 40 lambs, or a combined car, figured on 2 lambs as the equivalent of one beef animal) must be purchased. Stock purchased is subject to approval as to type and suitability by the official representative of the Dominion Live Stock Branch serving the point of purchase. Special provision has been made to extend the benefits of the policy respectively to farmers of Eastern Canada, of the Prairie Provinces, and of British Columbia. Complete details and information about the policy and the benefits can be secured by writing the nearest stockyard agent of the Dominion Live Stock Branch, or direct to R. S. Hamer, Chief, Cattle Division, Dominion Live Stock Branch, Ottawa. The policy is operative for a period of five months from and after August 1, 1932.

Ontario Relief Organization

Public Welfare Board For Each Municipality To Handle Direct Relief

Organization of a public welfare board for each municipality to administer direct relief is recommended in the report of the advisory committee on direct relief to the Ontario Government, and announced by Hon. Dr. J. D. Monteith, Minister of Public Works and Labor. Where possible, it is also suggested that an association or league of organizations interested in public welfare should be organized to act in an advisory capacity and arrange for the conduct of campaigns in connection with the raising of funds, etc.

Housekeeping accounts in an Ohio farm indicate that a farm family of five people spends about the same money for food that a bachelor does in the city.

Eggs are better than a spring tonic, in view of the iron, vitamins and protein they contain, is the advice of the bureau of economics.

A Model Mining Camp

Only Well Equipped Men Get Into Echo Bay

While the rush to Conjuror's Bay gold strike continues unabated (there are probably between 75 and 100 men on the ground now), Cameron Bay and the area immediately surrounding it does not lack excitement. Despite inroads made on the floating population of the main settlement by the gold fever, the number of permanent residents continues to soar and every day sees the community rooting itself deeper on the wooded foreland that three months ago was entirely untenanted.

Uniformed law and order has come in the shape of a Royal Canadian Mounted Police detachment, the officers arriving when the Speed 11 made her second trip across from Fort Franklin. Echo Bay unlike most mining camps, has failed to produce any "bad men" to date, this no doubt being due to the fact that it is accessible only to well-equipped men with definite business to do. There is a real place in the life of the field for the police, however. Handling malefactors is only one item in the complex duties of the Royal Mounted.

Cameron Bay's first white woman landed July 27, in the person of Mrs. J. Gerhart. Wearing a coat of tan such as no bathing beauty could produce and dressed in masculine attire, she ended a journey of 2,000 miles in which her husband and two other men from Berwyn, Alberta, brought a couple of power-driven scows from the waters of the Peace to Echo Bay. With two months of river, lake and rapid behind her, she emerged in the conventional garb of civilization. So the all-male world known for many long months has collapsed. So far no protests have been heard.

J. J. Byrne, head of the Great Bear Lake mines, was a recent arrival by aeroplane and, donning the regulation drill clothes and high boots of the area, he has plunged into the activities of the field with the zest that marks every one from Conjurer to Hunter Bays. Mr. Byrne reported that when he was at Fort Resolution traffic was still headed toward the Mackenzie, the Bear and the lake. Obviously there is to be no petering out of the first surge of boats which has already descended on Great Bear, but the rush to the field will continue throughout the period of open water.

Many of the early arrivals and the majority of the late ones intend remaining over the winter and have brought well-stocked outfits to make this possible. In most cases, however, cabin building is being left until a later date. The main idea at the moment is to get to Conjurer Bay while there is still open ground.

Find Free Gold

Important Discovery Reported In Great Bear Lake Mineral Field

Free gold, the first ever found in the field, was picked up on the Oro Group, staked in the spring of 1931, by Charles Sloan, veteran prospector, according to word received from Cameron Bay in the Great Bear Lake mineral field.

This group adjoins the Eldorado group and Labine Point; and work is proceeding feverishly to tap the discovery and ascertain its extent. The free gold is quite coarse and appears in particles about the size of wheat grains in the quartz.

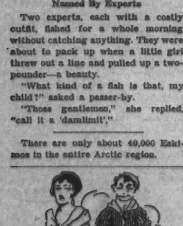
Named By Experts

Two experts, each with a costly outfit, fished for a whole morning without catching anything. They were about to pack up when a little girl threw out a line and pulled up a two-pounder—a beauty.

"What kind of a fish is that, my child?" asked a passer-by.

"Those gentlemen," she replied, "call it a 'damlimit'."

There are only about 40,000 Eskimos in the entire Arctic region.



Bus: "All is over, I have nothing to say to you."
He: Well, make it brief."—Buen Humor, Madrid.

UNIQUE SERVICE COMMEMORATES EIGHT HUNDREDTH ANNIVERSARY OF ABBEY

A special service was held in the wonderful ruins of Fountains Abbey, Yorkshire, England, to commemorate the 800th anniversary of the laying of the foundation stone. Thousands flocked to the beautiful silver-grey ruins of the famous Cistercian Abbey, to take part in the roofless nave, including the Duke and Duchess of York. The picture on the left shows the arrival of the popular Duke and Duchess, while the photo on the right gives a general view of the service inside the Abbey.

Record Hard To Beat

New Jersey Man Has Been Commuter Sixty-Four Years

Addison H. Day, who will be 82 years old in November, has begun his sixty-fourth years as a regular commuter between Chatham, New Jersey and New York. When he stepped aboard the train the other morning at his home town to go to his desk in the office of the Marine Midland Trust Company, at 120 Broadway, where he is an official, he started on his thirty-ninth commutation trip around the world, figuratively speaking. Officials of the Lackawanna railroad have estimated that in sixty-three years Mr. Day who has earned the title of champion commuter of the nation, has covered 956,000 miles on the railroad to and from work, equivalent to thirty-eight times the circumference of the earth.

Oddest Of Odd Jobs

Cornet Player Assists In Tuning Musical Auto Horn

The odd jobs around factories where automobiles and automotive parts are made are among the oddest of all human undertakings. For instance, there is the job of the cornet player in one of the plants making a very special and expensive motor car horn. When a finished horn comes from the produion bench, the cornet player toots an arrangement of four notes. An assistant with a musical ear then blows the horn. If they decide it is pitched correctly, it is sent on to the market place. If not, it goes back for further tuning.

Strike At Price Cutting

Canadian Retail Druggists May Ask Aid Of Parliament

Canadian retail druggists may ask the Dominion Parliament to amend the Combines Act so as to permit retail distributors to fix reasonable prices upon trade marked goods. Dr. R. B. Stanbury, secretary of the Canadian Pharmaceutical Association, stated in Toronto.

His statement followed discussions at sessions of the Canadian Association and the Ontario Retail Druggists Association where delegates deliberated upon possible legal ways of fixing prices so as to strike at price cutting.

Advertising Does Pay

A young actress one day lost a string of pearls, and she advertised the fact in a weekly journal. Afterwards, when asked if she had recovered the lost property, she answered excitedly. "Yes! And isn't advertising wonderful! The pearls I lost were only imitation, but those that have been returned to me are the real thing!"

University Makes History

For the first time in the history of the University of Toronto three dentists have been given honorary degrees. This demonstrates that the members of this profession are developing an even greater pull and that the recognition is given of their services to University pupils after they have finished grinding their teeth over examination papers.

The line needs to be more sharply drawn between careful and reckless flying on the part of airplane pilots, is the conclusion of a university professor, who has made flight tests to study safety.

The Oath Of Allegiance

Has Been Cause Of Trouble With Ireland Before

The fuss in Ireland over the oath of allegiance is not the first time the oath has caused trouble in Great Britain and Ireland. Both Sir David Salomons and Baron Lionel de Rothschild objected to the oath containing the phrase: "True faith of a Christian." In 1858 these words were deleted for all members of non-Christian religions.

Later, Charles Bradlaugh, atheistic lecturer and writer, who was strongly republican in sentiment, objected to taking any oath at all. He had to be ejected from the House of Commons.

Then it became optional with the members to take either an affirmation or an oath of allegiance. Occasionally some member balks at the oath and affirms his allegiance, instead. However, most of the members are sworn in by the old-time oath.

Ever since 1066, British history has been replete with such objections. There have been constant ripples on the waters of government. Each one plays its part in the progress of democracy. The good points of the objections are made part of the constitution, and the bad are just discarded.

Chinese Woman Gets Degree From Japan

Former Shanghai Professor Is Now Doctor Of Science

The first Chinese woman to receive a doctor's degree from a Japanese university is Miss Tao Welsun, former professor of chemistry in the Tatung University, Shanghai, who has been awarded a degree of doctor of science by the ministry of education. Her thesis was "A Scientific Study of the Digestibility of Rice Starch," and was accepted by the science department of the Imperial University, Kyoto.

Miss Tao is 37, and attended school in Tokio before entering Columbia University, New York, where she received her bachelor's degree in science.

Judge—"Do you know the meaning of an oath, madam?"

Witness (proudly)—"Your honor! An' me husband shippin' before the mast these fifteen years!"

Inspect Canned Salmon

All Importations In Future Must Pass Rigid Inspection

All canned salmon imported into Canada in future must undergo an inspection similar to that now required in the case of salmon packed in British Columbia, and no import shipment may be released until it has been so inspected. This is the purport of an order-in-council passed at Ottawa. As all importations of canned salmon come from the Pacific side, the order-in-council also provides that all shipments "imported for sale in Canada shall enter through a British Columbia port only."

The inspection of imported salmon will be carried out by the permanent board of inspection in British Columbia.

Receive Legacies

Lord Inchcape Leaves Bequests To Officers Of Steamship Lines

Legacies totalling more than £40,000 were bequeathed by Lord Inchcape to about 900 officers of the Peninsular and Oriental and British India Steam Navigation Lines, it was learned in London, England.

Lord Inchcape, noted British financier and shipping magnate, died last May, and his will described the gifts to the officers as a "slight acknowledgement of their loyalty and fidelity" to him.

Two hundred and two captains will receive £100 each, while 200 chief officers and the same number of chief engineers will receive £50 each.

Cody's Old Servant Attends Dedication

Travels 2,000 Miles For Ceremony At Cody Peak

James Lyman Brown, 92, the first cook for Col. William F. (Buffalo Bill) Cody, was present at the dedication of Cody Peak, recently.

Brown, whose home is in Danville, Ind., made the 2,000-mile trip to Wyoming especially to attend the ceremony.

The aged chief first worked for the famous scout in 1870 and was in his employment for many years. Brown was with Cody during his famous trips to Europe to perform before royalty.

FANCIFUL FABLES

Strange Manifestation

Germany Having Problem In Connection With Nudist Cult

Among its other perplexities the German Government has the nudists on its hands. The passion to go about unclothed is sweeping the world. Nudism has been common, we are told by travellers, in parts of Russia for some considerable time. It has cropped out in unpleasant manifestation in Canada among the Doukhobors as a form of mass protest against real or imagined grievances. Sects of sunbathers who are nudists, or within a wisp of it, have sprung up in England; but the most determined cult of skin-worshippers is apparently in Germany, and the German Government is trying to force its nudists back into their clothes by the imposition of fines.

We are so close to our own times that only by making a special effort can we realize what an eccentric age it is. Standards, and values, and principles, and beliefs which are the controls of human conduct for a century have, during the past dozen years, been scrapped and tossed overboard into the ocean of uncertainty on which we are sailing. It has always been a mark of uncertain and disturbed periods for the races of Northern Europe to develop cases of nudism. To go naked is the most original thing a civilized person can do; the most arrogant challenge he can throw in the face of convention and society.

To what extent the epidemic of nakedness in Germany can be explained by this theory it might be hard to say; but it is an extraordinary indication of how abnormal are the conditions into which sections of the German people have fallen, and the effects the conditions have had on their behaviour. It throws a curious sidelight on German trends under heavy political and social pressures.—Manitoba Free Press.

New Way To Raise Money

Switzerland Has Parade Of Ancient Cars To Aid Jobless

Venerable motor cars from many countries were recently recalled from their well-earned rest and paraded before the citizens of Zurich, Switzerland, in a campaign to help the unemployed of that city.

In a programme organized by the Swiss Automobile Club and other groups interested in automotive transportation, a parade of 450 vehicles, ranging from luxurious limousines to street cleaning equipment, was a feature. Twenty-five of these were obsolete cars produced between 1896 and 1910.

Automobiles from five countries took part. The United States led with nineteen entries. Next came Germany with five, followed by Italy with four, France with three, and Austria with one entry.

The Poultry Industry

Says Canada Can Compete Successfully In Empire Markets

Poultry men in Canada are having a difficult time, but they are not down-hearted, F. C. Elford, of Ottawa, told the national conference of agricultural officials meeting at Toronto.

Suggestions that Canada could not compete with European countries into the United Kingdom market were not correct, declared Mr. Elford, who is a former president of the World's Poultry Congress. He contended that while the European producer had some advantages in shipping costs, Canadian farmers are far ahead in high flock production, good sanitation, lower taxes and a lower cost of feed.

Rail Safer Than Road

Figures For Accidents and Fatalities Show Big Spread

Comparing the accident figures for road and rail in Great Britain, C. T. Cramp, at a national road conference, stated 239 persons were killed on the railways last year, 200 of whom were railwaymen, whereas 6,691 were killed on the roads. Every day 18 are killed in road accidents. There were 22,695 injured on railways, including every accident, however trivial, whereas on the roads the number reported was 202,119, in addition to thousands of accidents not reported.

Country Ones Are

The inspector (examining a class of boys) picked on a ruddy-faced country lad.

"Now, boy," said the inspector, "do you know what vowels are?"

"Iss, sir. I know what vowls are!"

"Well, what are vowels?"

"Why, sir, vowls be chickens!"

George Washington was made an honorary citizen of France in 1793.

A Priceless Possession

Famous Peacock Throne Of India Worth Thirty-Five Million Dollars

Valued at $35,000,000 and made in India in the thirteenth century for the Great Moghuls, the exquisite Peacock Throne, writes Penelope Beadnell in the illustrated Weekly of India, was taken from Delhi in 1739 to Teheran by Nadir Shah, and when in Persia last year I was lucky enough to be able to see this magnificent piece of workmanship.

As we arrived at the Palace gates, the sentries saluted and two soldiers approached to conduct us through the Royal precincts. We crossed the first courtyard, where fountains played in a long marble basin, and went through an archway into the inner garden. Delicately arched bridges traversed the little artificial lakes and limpid streams, and tall poplars were reflected in the clear cool water.

Two more soldiers and a high official of the court met us at the entrance to the Palace itself, the walls of which were covered by colored tiles of various designs. To the right two twin square towers denoted the "Endevoun" or women's quarters.

We entered the Shah's residence by a triple doorway, supported by four pairs of marble columns, mounted a handsome staircase and were conducted through a succession of magnificently carpeted rooms till at last we reached the Treasure Room. In the presence of the Shah's officials and soldiers the seal of the lock was broken, and a moment later the door was thrown open. At the far end of the long gallery stood the priceless "Takte Tavoos" or Peacock Throne.

The throne itself is about six feet high at the back with arms and platform for the feet, covered with a plating of pure gold, chiselled and enamelled with embossed and openwork designs. The gold is encrusted with precious stones of every color, as varied as the hues in a peacock's tail; diamonds, emeralds, turquoises, rubies—some nearly an inch long. Until recently this had been a fringe of enormous emeralds hanging from each arm of the throne, but these—owing to their immense value—have been removed and locked up separately.

Besides the throne there is a couch of similar workmanship, about eight feet by five, and standing some three feet from the ground. Each of its six legs is carved to represent a peacock's breast, and there is a pair of steps for His Majesty to ascend. On this the Shahs used to recline when holding their audiences, but now the present Shah uses the "Takhte-i-Marmor," a white marble throne, beautiful too—though not to be compared with its counterpart. At the back of the couch is a scintillating circular star of large diamonds, about a foot across, which a mechanical contrivance behind it revolves on state occasions.

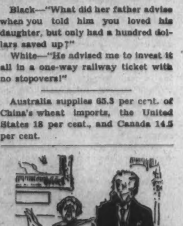
The Treasure Room is lined with mirrors which reflect each other over and over again. In cases along the walls were Sevres and Chinese porcelain, daggers with carved and jewelled handles, gold cups and plate, mosaic pictures, a terrestrial globe in precious stones and treasures of every sort from every region of the world.

Once more the door is locked and sealed, the officials bow to each other, the soldiers salute, the keys carried away; we descend by another staircase, and our visit to the Shah's dwelling is over.

Black—"What did her father advise when you told him you loved his daughter, but only had a hundred dollars saved up?"

White—"He advised me to invest it all in a one-way railway ticket with no stopovers!"

Australia supplies 63.5 per cent. of China's wheat imports, the United States 18 per cent., and Canada 14.5 per cent.



"What would you do if I became deaf and dumb?"
"I should put out the light when you started arguing with me."—Karikaturen, Oslo.

THREW AWAY HIS STICK

When Sciatica Yielded to Kruschen

There can be no doubt that this man has finished walking with a stick, for it is now four years since he discarded it.

He writes:—"For 18 months I suffered with chronic sciatica and rheumatism, and was unable to walk without the aid of a stick. But after taking Kruschen Salts for a short time, I was able to throw away the stick. It is now four years since this happened, and I have had no return of the complaint, and have not lost a day from work. I shall never be without Kruschen Salts, as they are worth their weight in gold. You can use this letter as you please, as I can honestly recommend Kruschen Salts to any sufferer."—C. F.

If the eliminating organs become sluggish, they permit harmful uric acid to accumulate and deposit itself in the tissues, muscles and joints in the form of needle-pointed crystals, which, piercing the nerve sheaths cause excruciating pains of sciatica. The six salts in Kruschen stimulate the eliminating organs to healthy, regular action. Mischievous uric acid is then given no chance to collect.

WORLD HAPPENINGS BRIEFLY TOLD

Robert Moodie, 67, who had been for nearly 40 years connected with the circulation side of the "News of the World," being its senior representative in the South of England, is dead.

Dr. John Stanley, junior research investigator on the staff of the National Research Laboratories, formerly of Vancouver, B.C., has resigned. He has accepted the post of assistant professor of biology at Queen's University, Kingston.

A royal robe of sealskin, ornamented with ermine, to be worn on state occasions only, has been ordered by the emperor of Ethiopia from a firm of Montreal furriers. His majesty insisted the order be placed "within the empire."

The order of the Red Star, the highest decoration of the Soviet government, has been awarded to Col. Hugh L. Cooper, United States engineer, for his work on the huge Dnieprostroy power development in southern Ukraine.

Having kept a census of horses since the World War, the British War Office will start one of automobiles.

Apartments built in Greater Copenhagen, Denmark, last year, totalled 8,522, the largest number ever recorded in any 12 months.

No change is to be made in the size of Canadian one dollar bills, the finance department stated recently. Recent rumor said the Canadian bill would be cut down in size, much after the style of the smaller United States bills.

British Columbia's oldest pioneer, Alexander MacLean, aged 81, who came to British Columbia 74 years ago and whose memories went back to the days when the site of Vancouver was dense forest, is dead. He was born in San Francisco.

Liner Card-Sharpers Have Lost Occupation

Practice Is Almost Unknown Now On Atlantic Boats

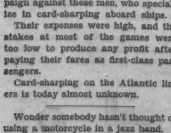
In many of the world's big cities today, including London, England, are the scattered bands of clever and well-educated men who at one time were expert card-sharpers on the great luxury liners.

The depression, which brought about a scarcity of easy money, helped the police in their vigorous campaign against these men, who specialize in card-sharping aboard ships.

Their expenses were high, and the stakes at most of the games were too low to produce any profit after paying their fares as first-class passengers.

Card-sharping on the Atlantic liners is today almost unknown.

Wonder somebody hasn't thought of using a motorcycle in a jazz band.



"Why do you sit and drink from morning till night?"

"Well, you don't expect me to sit up at night to do it?"—Allt for Alla, Stockholm.

Seaplane Base At The Pas

Manitoba Town To Be Registered On Air Route Maps

Erection of a mast and wind cone on the bank of the Saskatchewan River, as a guide to fliers, will be arranged by the Board of Trade of The Pas, Man., through the co-operation of the Imperial Oil Co.

The wind cone, which will mark the landing place, and a mooring platform for pontoon equipped 'planes, will be arranged by the board.

H. L. Weber, agent at The Pas, for the Imperial Oil Co., offered the cone and assistance in its erection, and the board accepted the offer, passing a resolution of thanks to Mr. Weber's company.

The board will have The Pas, Man., registered on Canadian air maps as a fully equipped and qualified seaplane base.

New Form Of Advertising

Interesting Process Used To Project Writing On Clouds

Sky writing, a new form of advertising in which the message is projected on the clouds at night, was demonstrated at London. The government recently decided the method was legal. The process involves the use of metal stencils placed in the beam of a powerful searchlight to cast letters on to the cloud base. The searchlight used is of 450,000,000 candle power. For skywriting purposes the limit of its really effective range appears to be a cloud base of about 3,000 feet high. Most of the legends shown contained up to twenty-five letters. Some include a design such as the British lion.

477

A CHIFFON PRINT FOR FORMAL AFTERNOON AND EVENING GAIETIES

Don't you think it lovely to have a dress with a certain amount of swishiness about its hem for more formal occasions?

A delicious print in chiffon made today's model in white with splashy red flowers. The soft crepe silk girdle toned with the print.

It's a dress that would do delightful duty for informal evening wear.

Sheer chiffon voiles are also charming and satisfactory. They fab beautifully.

Crepe silk and triple sheers can also be used for this sleekly slender model.

Style No. 477 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 4 yards of 39-inch material with 1¼ yards of 35-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Increase Shown In Canada-Empire Trade

Statistical Review Issued By Department Of Trade and Commerce

Canada is becoming more empire conscious in her purchases.

A statistical review, issued by the Department of Trade and Commerce, showed that nearly 30 per cent. of the Dominion's imports in July came from empire countries as compared with only 26.3 in the corresponding month last year.

The percentage of foreign imports dropped from 73.7 per cent. in July to approximately 70 per cent.

Compared with the preceding July, Canadian imports last month from foreign countries registered a drop of $10,621,346, while those from empire countries decreased by only $2,000,000.

In July Canada wrested from the Netherlands second place amongst countries of the world in supplying the cheese market of the United Kingdom. British trade figures, the Dominion Bureau of Statistics reports, show that the leading importations were: New Zealand, 16,602,208 pounds; Canada, 12,286,864 pounds; and Netherlands, 11,384,656 pounds.

There was a sharp advance in the importation of Canadian canned salmon by the United Kingdom in July. British trade figures give the amount as 1,726,928 pounds as compared with 488,872 pounds a year ago. The United States supply last month was 465,584.

Why Outlined Profiles Are Called Silhouettes

Named After French Finance Minister Noted For Strict Economy

The black profiles called silhouettes are named after Etienne de Silhouette, the Finance Minister of France in 1759. Silhouette made an immediate name for himself by the stringent economies he effected in public finance. It was his policy to refuse to pay for more than "the shadow of any substance." The process of outlining profiles thrown by shadow on to a white sheet had just been introduced at that time, and as these pictures were considered exactly to resemble the Minister's avowed policy, his name was immediately bestowed upon them.

Liquor In Bulk

Saskatchewan Commission Planning To Follow Lead Of Other Provinces

The Saskatchewan Liquor Commission is planning to follow the lead of other provinces and import certain brands of liquor in bulk instead of in bottles.

By importing hogsheads of liquor and bottling it here, a saving is effected on overhead items such as the cost of bottling and excise duties. The bulk purchase scheme, it is expected, will mean lower prices to the purchaser.

Your Pipe Deserves The Best!

. . . particularly when the best costs you no more than ordinary tobacco. Smokers realize how much more fragrant, how cool, how satisfying a pipe can be when it's loaded with Ogden's cut plug.

OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco.

Secure Animal Pictures

American Nature Association Party Meet With Success In Rockies

After four weeks on the trail along the northern boundary of Jasper National Park and the adjacent mountains of British Columbia, the American Nature Association party returned to Jasper Park Lodge with several thousand feet of big game motion picture films.

Under the leadership of Arthur N. Pack, Princeton, N.J., president of the association, the party included Laurence S. Rockefeller, Tarrytown, N.Y., son of John D. Rockefeller, Jr.; Mrs. Pack, Mr. and Mrs. Robert W. Johnston and Mr. and Mrs. W. B. Bryan, Jr., all of Princeton.

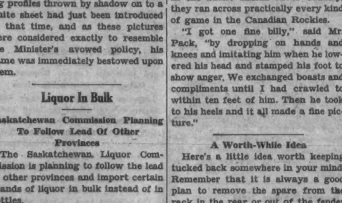
Some novel stalking won a number of fine shots for the camera crew. Wearing white costumes with hoods, Mr. and Mrs. Pack aroused sufficient interest among the ordinarily-suspicious goats to approach within a few feet of them on one occasion. In the Tonquin Valley the party discovered a herd of more than 100 caribou and acquired some fine close-ups. Later, in the Snake Indian River country, they ran across practically every kind of game in the Canadian Rockies.

"I got one dns billy," said Mr. Pack, "by dropping on hands and knees and imitating him when he lowered his head and stamped his foot to show anger. We exchanged boasts and compliments until I had crawled to within ten feet of him. Then he took to his heels and it all made a fine picture."

A Worth-While Idea

Here's a little idea worth keeping tucked back somewhere in your mind. Remember that it is always a good plan to remove the spare from the rack in the rear or out of the fender well before backing up the car to take off the flat. Otherwise, in getting the spare loose the car may be shaken enough to cause it to slip off the jack.

Iceland has 1,600 automobiles.



BRITISH PARLIAMENTARIANS

Hon. Sir Phillip Cunliffe-Lister, and his private secretary, Captain T. L. Dugdale, M.P.

Distinguished Visitors Deliver Addresses On Trip Through Western Canada

By the achievement of the Imperial Conference we have shown how a great group of nations can organize for trade purposes along their lines, is the opinion of the Right Honorable Sir Phillip Cunliffe-Lister, C.B.E., M.C., M.P., Secretary of State for the Colonies, expressed during a brief stop in Winnipeg on a tour over Canadian Pacific Railway lines to the west coast.

Sir Phillip was accompanied by a group of keen young British parliamentarians eager to see western Canada in the harvest season. Among them were his own private secretary, Captain T. L. Dugdale, M.P. for Richmond and Yorkshire, one of the largest agricultural constituencies in England; J. P. L. Thomas, M.P., private secretary to the Secretary of State for Dominion Affairs; Geoffrey Lloyd, M.P., private secretary to the Lord President of the Council, and Viscount Hinchingbrooke, private secretary to the Right Honorable Stanley Baldwin.

"In England," said the distinguished visitor, "we have taken the tariff out of politics and put it into business, making it an entirely business proposition. The tariff has to be adjusted to what the producers need and no more. Recognition of that fact marks all the agreements that were reached at the conference. Everything was approached from the point of view of getting the equilibrium between supply and demand, so that all would get the fairest prices."

Sir Phillip felt that British manufacturers would devote more attention to developing the Canadian market as a result of the concessions made by the Dominion Government, and that the situation and the market possibilities were already being studied. He had every confidence in the ultimate results.

The Secretary of State for the Colonies and his party spent a week-end in Banff as guests at Banff Springs Hotel and the surrounding resorts, through which they motored. Proceeding to the Pacific Coast Sir Phillip addressed several meetings under Canadian Club auspices and also spoke at Winnipeg on his return trip at a board of trade luncheon at the Royal Alexandra Hotel.

Indications More Favorable

Better Tone Said To Pervade Business Circles

Although no definite improvement has yet appeared in the volume of Canadian trade, a better tone pervades business circles and greater activity is in sight, according to a business summary of the Bank of Montreal.

Full average crops are assured, says the report. Wheat crops in the prairie provinces will run 100,000,000 bushels more than last year and low harvesting costs will be helpful to farmers and all branches of business. Except for hay, crops in other provinces are excellent. Livestock prices are low but marketings are large and the dairy industry maintains a normal output with recent advances in the price of cheese and butter.

Most manufactures continue slight but shipping is better than last season; more grain has passed through Montreal; more British coal is being imported and a stronger autumn business is expected.

The report points to the general hardening of commodity prices as an encouraging sign. Export trade for July was higher than in any month since December. Imports were down, increasing Canada's favorable trade balance.

More confident feeling with a rise in commodity prices is reported for both the United Kingdom and the United States.

Recipes For This Week

(By Betty Barclay)

BANANA BETTY

2 cups rice flakes crushed.
¼ cup butter, melted.
2 apples.
2 bananas.
½ cup sugar.
½ teaspoon cinnamon.
¼ cup water.
2 tablespoons lemon juice.

Pour melted butter over rice flake crumbs and mix thoroughly. Place a layer of one-third the prepared crumbs in bottom of buttered baking dish. Cover with 1 apple and 1 banana, pared, and thinly sliced. Sprinkle with half the sugar, cinnamon, and lemon juice. Cover with another layer of crumbs and repeat, using remaining fruit and seasonings. Pour water over mixture. Bake in moderately hot oven (375 degrees Fahrenheit) 30 minutes. Serves 6.

COCONUT SALAD DELICIOUS

2 cups cabbage, finely shredded.
1 cup grated pineapple, drained.
1 cup coconut, premium shred.
¾ cup mayonnaise.
Dash of salt.

Crisp cabbage by allowing it to stand in ice water. Drain and dry thoroughly. Toss lightly together with remaining ingredients. Serve on crisp lettuce. Garnish with strips of pimiento and chopped chives. Serves 6.

Vases Placed In Archives

Texas University Has Ornament Belonging To Helen Of Troy

Two vases circumstantially accredited with being from the boudoir of Helen of Troy have been placed in the archives of the University of Texas, at Austin. They are the gift of the late A. W. Terrell. Minister Terrell received them from Consular Agent Frank Calvert, who owns the site of the ancient city of Troy. Calvert cooperated with Dr. Heinrich Schliemann in excavations of the ancient city.

"Is that your college diploma you have framed there?"

"Well, it's a sort of diploma. It's a worthless stock certificate showing that I've been through the school of experience."

British Speed Up Telephone System

Invention Called "Ghost Circuits" Perfected By Post Office

In an effort to speed up the British telephone system the post-office has perfected an invention which is expected to prove revolutionary.

A new system of "ghost" telephone circuits using one pair of telephone lines has been introduced.

It established a new British record when first inaugurated to tell the world of Kaye Don's record-breaking run in the British speed boat, "Miss England III," on Loch Lomond.

"The new development is based on the carrier wave system of voice transmission," said an official of the G.P.O.

"It is really after the principle of wireless applied to the telephone. The engineers, who have been testing at the research station in London, have established that in theory one circuit of two wires can be used for any number of circuits.

"Conversation on the 'ghost' circuit is absolutely private. This is regarded as a great achievement."

Church Service Held On Nelson's Flagship

Was Notable Event Of Navy Week At Portsmouth

Naval officers and bluejackets stood bareheaded with citizens of Portsmouth, on the decks of the Victory, for the first public church service that has ever been held to usher in Navy Week.

More than a thousand people gathered on the stone pavings below surrounding the famous old warship to join in the service, which was relayed by loud speakers.

The hymns were, "O God our help in ages past," and "For those in peril on the sea."

The Bishop of Portsmouth based his sermon on the life of the navy's greatest admiral, Nelson.

A small group of people afterwards filed Nelson's day cabin, two decks below, surrounded by his own furniture, to receive communion from the admiral's own communion plate.

A Record For Speed

Parcel From Montreal Reached Bagdad In Thirteen Days

From Montreal to Bagdad in 13 days—this is the record established in sending a 10-pound sample consignment of Canadian industrial products to Bagdad.

Of the 13-day period, seven days were taken for an ordinary steamship crossing from Montreal to Liverpool. From the Merseyside the package was expressed to London, thence by automobile to Croydon airport where it was just in time to catch the London-Indian mail 'plane. On the 13th days of its journey the consignment reached its destination, ready to capture a new market in the Near East.

Why argue? If you are right, you learn nothing. And being wrong makes you so mad you don't want to learn.

"The neighbor's piano is too loud. Shut the door."

"It is shut."

"Then turn the key."—Pages Gaies, Yverdon.

Satisfy their 'tween-meals hunger with Christie's Premium Soda Crackers and milk, or jam, or spreads, or peanut butter. They'll love them and so will you. Keep a package in the pantry all the time for soups, salads, desserts, quick lunches.

Crisp, light, flaky and slightly salted. Delicious.

Christie's PREMIUM SODA CRACKERS

Retain Consular Services

U.S. Not Planning To Close Any Consular Offices In Dominion

Though the state department is working on a programme to close United States consulates as an economy move, it is learned at the department that none in Canada is likely to be shut down. The United States maintains 29 consulates and six consular agencies in the Dominion, more than twice as many as in other countries, but it is said by state department officials that all are busy.

Asked by congress last spring what contributions his department could make to government savings, Secretary of State Stimson said he would rather close minor embassies and legations than curtail consular services abroad. It was rumored then that the United States legation at Ottawa might come under the economy axe but this report was denied and it is now said there is no intention to remove from the Canadian capital its senior foreign diplomatic establishment.

Has No Use For Money

Hermit Of Hebrides Finds Contentment On Lonely Island

On the mile square island of Mingulay in the Outer Hebrides, 100 miles from Scotland, lives a really happy man.

He has solved all the problems of life. He never uses money; seldom sees another human being, and does not care a jot about reparations and tariffs.

Wars, plagues and deaths of kings occur, but he never hears of them. He is neither a convict nor a lunatic, but simply a Scottish farmer named Russell, who hates civilization. He lives alone.

Everything he needs he finds on his island, growing his own food and making his own clothes; as happy and carefree as a savage. Sea birds, fish, goats and sheeps are his only companions for miles around.

The First Railway Whistle

Was Used Hundred Years Ago In Leicester Road

London newspapers to hand comment on the fact that July 17 last, was the centenary of the railway whistle, stating "that the design has changed little since a Leicester musical instrument maker fashioned "a steam trumpet to be worked from the boiler." On July 17, 1832, the first train was run on the Leicester and Swannington Railway, and the management, realizing that there was no other warning available than the old coach horn, gave the order for the steam trumpet. The locomotive has thus been whistling for a hundred years and there are many persons who will hope that the whistle will still be heard a century hence.—Montreal Gazette.

Powdering Rubber By Mechanical Process

British Financial Support Given To Invention Of Dutchman

Powerful British financial support is said to be behind the plan to establish a company for the production of rubber in powdered form at Amsterdam. Great interest is being taken in the proposal, but all details are kept secret.

The process has been invented by a Dutchman, and its chief importance lies in the claim that rubber can be produced in powder form by means of a mechanical process whereas hitherto only a chemical process has been possible. Experiments have also been made in mixing the powdered rubber with asphalt for road surface purposes.

Reverse Gear

A prosperous farmer has gained the reputation of being the meanest man in his town, and consequently is not a favorite with his neighbors.

He owns an old horse which, to put it mildly, is very thin. As if to make up for the lack of flesh on its body, however, the animal has a head many sizes too large. The other week he went to the expense of a new collar for the animal. A few minutes after the delivery he was back at the saddler's with the collar.

"You've made it too small," he blurted out. "I can't get it over his head!"

"Over his head!" replied the saddler. "Man alive, it wasn't made to go over his head. Back him into it!"

Pelicans have no song and the adults no call-notes, while the young call for food with a low grunt, rising at times to a shrill scream.

Most woodpeckers bore round holes in trees, but the pileated woodpeckers dig both round and square holes.

Radio And War

Giving Publicity To International Despatches May Save Future Trouble

Imagine the summer of 1914, if present broadcasting facilities and the present degree of international interest had existed. English listeners would have heard the case of Germany, the case for France, the case for all the belligerents put as eloquently and as popularly as it could be put, not only in the language of each country, but addressed in their own tongues to all the principal Powers. War Offices and Admiralties throughout Europe would have fumed at all this talk and publicity, but it would have been practically impossible to avoid it; the politicians would have welcomed it, and I think the public would have demanded it. The delaying effect would surely have been considerable. But even if the situation had not yielded to the cold light of international analysis at the microphone, the difficulties of conducting a war in the public ear, as it were, with its moves and repercussions overheard and checked by everybody, would have been more than considerable. Yet this is actually the state of things which, so far as I can see, will prevail in future. No matter how much a Government may take over a national service and exclude all but official pronouncements, it will not be able to prevent listeners from hearing also the news and statements from abroad which shed another light on policy and on operations. To the layman it seems futile to consider the new war and its weapons except against this realistic background of world-wide publicity and a world-wide interchange of news and views.—Week-End Review.

Danger From Police Dogs

Tameness Makes Them Greater Menace Than The Wolves

The papers urging that "police dogs" should not be permitted in cities call it a "tame wolf." Quite. This very "tameness" makes him more dangerous to people than the wolf. The Canadian wolf will not come within a mile of a human being if he knows it. The Alsatian dog, on the other hand, is a friendly animal until at unexpected moments he reverts. Dogs of his temperament should not be kept in urban centres —it is not fair either to the dog or people in his neighborhood whom he doesn't know.—Ottawa Journal.

Need More Light

Specialists in lighting say that the pupils of "old eyes" admit only one-fourth as much light as the average adult eyes, and therefore should have four times as much light to use as the young adult needs.

Phelton: "Did you ever try making a comrade of your boy?"

Phelps: "Yes, but it didn't work. I found he was too old for me."

Many Ships Junked During Past Year

Lloyds Register Of Shipping Gives Number As 622

Six hundred and twenty-two ships were either lost, broken up, condemned or wrecked during 1931, according to Lloyd's Register of Shipping.

The total tonnage amounted to 1,368,829 tons, including 588 motor and steamships aggregating 1,335,708 tons and 64 sailing ships totalling 33,112.

British and Irish owned vessels numbered 314,957 tons. Compared with the figures for 1930, an increased loss of 103,187 tons is shown as regards steamers and motor vessels and a decrease of 47,651 tons in sailing vessels either lost, broken up or condemned. Ships broken up during 1931 amounted to 1,032,712 as against 898,474 tons in 1930.

New Kind Of Wheat

Cross-Bred Wheat Said To Be Immune To Hessian Fly Infestation

A new kind of "cross-bred" wheat that has inherited resistance to the Hessian fly, a wheat pest, was described by J. W. Parker and R. H. Painter, of the Kansas Agricultural Experimental Station, before the International Conference of Genetics.

The new wheat had less than one per cent. infestation by the fly as compared with 41 to 48 per cent. for a type susceptible to the fly. They found the quality of resistance to the fly can be combined with other desirable qualities such as bread-making quality, stiff straw and winter hardiness.

Science Perfects Cure For Car Drowsiness

Ancient Chinese Drug Is Said To Be Effective

Science has perfected a cure for the driver who falls asleep at the wheel of his automobile. Narcolepsy, the name given to sudden spells of irresistible sleepiness, has been found to succumb to doses of ephedrine, a drug which in the form of mahuang was used in Chinese medicine 4,000 years ago. Dr. Harry A. Collins, who announced the cure, declared one case had responded instantly, after recurring attacks for 12 years had caused him to have several automobile accidents.

Indians Offer Land As Buffalo Park

But Wyoming Braves Ask Privilege Of Killing Surplus

A buffalo reservation may be established in the Crow Indian reservation east of the Big Horn River, in Wyoming.

The Indians suggested the preserve be established and offered to give up a portion of their land provided they be permitted to kill some of the bison for food.

Only buffalo in excess of the number the range could conveniently hold would be slaughtered.

THE RHYMING OPTIMIST

By Aline Michaelis

LIKE FLOWERS

Women are like flowers:
Jessamine and rose
Through June's sunny hours
All their charms disclose.
Mignonette and lily,
Larkspur, coral spray,
Under breezes chilly
Shrink and fade away.
But when Summer gaily
Dances down the lanes,
They wax fairer daily
To her blithe refrains.
Love is sunshine, failing
When morn's mists depart:
Love is summer, calling
To a woman's heart.
Women are like flowers:
Until life is done
Living for those hours
When they see love's sun.

To Beat Unemployment

Germany Plans To Put University Graduates On Farms

Placing university trained young men on farms is the object of associations formed in Berlin and Leipzig, Germany, among the university people themselves. Jobs as agricultural laborers are being sought for thousands. Because, within a short time every third university trained man in Germany will have to join the ranks of the unemployed, unless something is done about it, efforts are being made to get farm work for as many as possible of the 60,000 academically trained men now unemployed.

Externally Or Internally, It Is Good.—When applied externally by brisk rubbing, Dr. Thomas' Eclectric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Indicative of the great urge modern girls have to travel, one single steamship company had 125 applicants for a single stewardess job they had open. Many were college girls.

Believe It Or Not

Resident Of Halifax Comes Along With Good Fish Story

The best fish story of this season is told by a resident of historic old Halifax. The story is about a gold fish, not the one who had no privacy, but an extremely adventurous gold fish.

The gold fish, according to a reputable Halifax journal, jumped four feet from its bowl to a chesterfield, where it lay in a state of coma for goodness knows how long. Discovered by its heart-broken owner before rigor mortis had set in, it was placed in cold water. No result. But upon being held over the stove it was reminded of its old home among the rice fields of Japan and gave several encouraging wiggles. Back again in its natural element it resumed its exposed and wandering, if restricted, manoeuvres. Believe it or not, and wonder what a gold fish thinks about.

German Medical Men Solve Old Problem

Claim Jealousy Caused By Excess Of Iodine In Blood

A number of prominent German medical men have solved the mystery of jealousy that has baffled the human race for many centuries. The Berlin physician simultaneously experimented on a number of women in municipal hospitals and have now come to the conclusion that an excess of iodine in the blood causes men and women to become jealous.

The medical men asked for volunteers to submit to experiments. The men were too proud and did not apply, but a great many women volunteered and allowed themselves to be hypnotized. Blood was drawn from them and submitted to microscopical examination. It was proven that the blood of jealous women had a hundred per cent. more iodine than that of women not so disposed.

Always keep Dougias' Egyptian Liniment at hand, ready to bring immediate relief to burns, sores and felons. Stops bleeding at once. Prevents blood poisoning. Splendid for sore throat and quinsy.

Three-In-One

"Did my medicine do any good?"

"A wonderful remedy doctor. I took three spoonfuls and my cough went, I rubbed three spoonfuls into my knee for rheumatism, and the rest we used to clean the silver."

It is said that "no man is a hero to his valet"—but if you want to get the real "low-down" you should hear what his banker thinks of him.

"Sir, my wife said I was to ask for a raise."

"Good, I'll ask my wife if I may give you one."

Reclamation Project

Reclamation of 10,000 acres of rich silt lands on the Kootenay River flats at an expenditure of $300,000 will be started this fall, it was announced by Hon. N. S. Lougheed, British Columbia Minister of Lands. The project will be completed within two years.

Building construction in Shanghai, China, is increasing.

Playing the game is the thing, not the score.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary housework, it is only natural that a worthwhile substitute for the musty dust cloth should be sought.

Now it has been found! Appleford Wonder Paper which actually dusts—as it cleans—as it polishes is receiving a hearty welcome from Canadian women who detest dust cloths and all they stand for.

Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in handy-size package, twenty-five sheets, each as large as a duster. You merely crumple a sheet into a soft wad, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floors.

And when you're through—throw it away. No duster to shake out or wash. No bother at all. The most obnoxious part of housework done in half the time and with half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous PARA-SANI heavy waxed paper in the Green Box. Most grocery, hardware and department stores sell Appleford Wonder Paper. If yours doesn't, just send the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario.
Enclosed find 25c for which please send me one full-size package of WONDER PAPER and your 100 recipes for "Left-overs."

All Her Children Were Troubled With Diarrhœa

Mr. J. J. Bickert, R.R. 1, Enderby, B.C., writes:—"Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."
